(54) DIAPER DISPOSER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a diaper disposer having such a structure that a twisted part of a package will not be opened.

SOLUTION: On an inner surface part of a cylinder 3, an elastic holding film 50 comprising a cylindrical side wall provided to enclose the diaper package 12 from the side surface side, and a bottom surface part provided at a lower end part of the cylindrical side wall to form an opening by plural cut parts radially extended from a center part is provided.
